

Cleaning of Grillo in washing cabinet

Washing without the use of disinfectants in a washing cabinet of the complete Grillo with 60° water and drying at 60° is recommended.

If disinfectants are used; this applies for the parts half-supports of the trunk and the complete pelvic support. It is necessary to indicate the type of washing as "Short Clean C" with non-acid disinfectant, with drying at a maximum temperature of 60° in order not to affect the paddings of trunk and pelvic support.
